Health Profile 2015

Health in summary
The health of people in Eden is generally better than the England average. Deprivation is lower than average, however about 8.0% (700) children live in poverty. Life expectancy for both men and women is higher than the England average.

Living longer
Life expectancy is not significantly different for people in the most deprived areas of Eden than in the least deprived areas.

Child health
In Year 6, 18.6% (86) of children are classified as obese. Levels of teenage pregnancy and GCSE attainment are better than the England average.

Adult health
In 2012, 24.0% of adults are classified as obese. The rate of alcohol related harm hospital stays was 562*, better than the average for England. This represents 321 stays per year. The rate of self-harm hospital stays was 110.5*, better than the average for England. This represents 54 stays per year. The rate of smoking related deaths was 203*, better than the average for England. This represents 75 deaths per year. Estimated levels of adult excess weight are worse than the England average. Estimated levels of adult physical activity are better than the England average. Estimated levels of adult road accidents are worse than average. Rates of sexually transmitted infections and TB are better than average. Rates of statutory homelessness, violent crime, long term unemployment, drug misuse, excess winter deaths and early deaths from cardiovascular diseases are better than average.

Local priorities
Priorities in Eden include older people’s health, dementia, reducing road accidents (particularly in young men), and reducing smoking. For more information see www.cumbria.gov.uk and www.cumbriaobservatory.org.uk

Population: 53,000
Mid-2013 population estimate. Source: Office for National Statistics.

This profile gives a picture of people’s health in Eden. It is designed to help local government and health services understand their community’s needs, so that they can work together to improve people’s health and reduce health inequalities.

Deprivation: a national view

The map shows differences in deprivation in this area based on national comparisons, using quintiles (fifths) of the Index of Multiple Deprivation 2010, shown by lower super output area. The darkest coloured areas are some of the most deprived neighbourhoods in England.

This chart shows the percentage of the population who live in areas at each level of deprivation.

Life expectancy: inequalities in this local authority

The charts below show life expectancy for men and women in this local authority for 2011-2013. Each chart is divided into deciles (tenths) by deprivation, from the most deprived decile on the left of the chart to the least deprived decile on the right. The steepness of the slope represents the inequality in life expectancy that is related to deprivation in this local area. If there were no inequality in life expectancy as a result of deprivation, the line would be horizontal.

Life expectancy gap for men: -0.5 years

Life expectancy gap for women: -0.4 years
Health inequalities: changes over time

These charts provide a comparison of the changes in early death rates (in people under 75) between this area and all of England. Early deaths from all causes also show the differences between the most and least deprived quintile in this area. (Data points are the midpoints of 3 year averages of annual rates, for example 2005 represents the period 2004 to 2006).

**Early deaths from all causes:**

**Percentage of hospital admissions that were emergencies, by ethnic group, 2013**

This chart shows the percentage of hospital admissions for each ethnic group that were emergencies, rather than planned. A higher percentage of emergency admissions may be caused by higher levels of urgent need for hospital services or lower use of services in the community. Comparing percentages for each ethnic group may help identify inequalities.

- **England average**
- **Local average**
- **Local least deprived**
- **Local most deprived**
- **Local inequality**

Health summary for Eden

The chart below shows how the health of people in this area compares with the rest of England. This area’s result for each indicator is shown as a circle. The average rate for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

### Significant worse than England average

- **Deprivation**
- **Children in poverty (under 16s)**
- **Statutory homelessness**
- **GCSE achieved (5A*-C inc. Eng & Maths)**
- **Violent crime (violence offences)**
- **Killed and seriously injured on roads**
- **Spiritual homelessness**

### Not significantly different from England average

- **Under 75 mortality rate: cardiovascular**
- **Recorded diabetes**
- **Recorded violence against the person crimes**
- **Prevalence of opiate and/or crack use**
- **Estimated users of opiate and/or crack cocaine aged 15-64**

### Significantly better than England average

- **Percentage of physically active adults**
- **Breastfeeding initiation**
- **Life expectancy at birth (Male)**
- **Life expectancy at birth (Female)**

### Children’s and young people’s health

- **Smoking status at time of delivery**
- **Obese children (Year 6)**
- **Alcohol-specific hospital stays (under 18)**
- **GCSE achieved (5A*-C inc. Eng & Maths)**
- **Under 18 conceptions**

### Adults’ health and lifestyle

- **Health status and health-related behaviour**
- **Health services usage**
- **Health and life expectancy**
- **Disability and care**

### Disease and poor health

- **Excess winter deaths (three year)**
- **Life expectancy and causes of death**

### Indicator notes

1. % people in this area living in 20% most deprived areas in England, 2013 2 % children (under 16) in families receiving means-tested benefits & low income, 2012
2. 3 Crime rate per 1,000 households, 2013/14 4 % key stage 4, 2013/14 5 Recorded violence against the person crimes, crude rate per 1,000 population, 2013/14
3. 6 Crude rate per 1,000 population aged 16-64, 2014 7 % of women who smoke at time of delivery, 2013/14 8 % of all mothers who breastfeed their babies in the first 48hrs after delivery, 2013/14 9 % school children in Year 6 (age 10-11), 2013/14 10 Persons under 18 admitted to hospital due to alcohol-specific conditions, crude rate per 100,000 population, 2011/12 to 2013/14 (pooled) 11 Under-18 conception rate per 1,000 females aged 15-17 (crude rate) 2013 12 % adults aged 18 and over who smoke, 2013 13 % adults achieving at least 150 mins physical activity per week, 2013 14 % adults classified as obese, Active People Survey 2012 15 % adults classified as overweight or obese, Active People Survey 2012 16 Directly age standardised rate per 100,000 population, aged under 75, 2010-12 17 Directly age sex standardised rate per 100,000 population, 2013/14 18 The number of admissions involving an alcohol-related primary diagnosis or an alcohol-related external cause, directly age standardised rate per 100,000 population, 2013/14 19 Estimated users of opiate and/or crack cocaine aged 15-64, crude rate per 1,000 population, 2011/12 20 % people on GP registers with a recorded diagnosis of diabetes 2013/14 21 Crude rate per 100,000 population, 2011-13, local number per year figure is the average count 22 All new STI diagnoses (excluding Chlamydia under age 25), crude rate per 100,000 population, 2013/14 23 Directly age and sex standardised rate of emergency admissions, per 100,000 population aged 65 and over, 2013/14 24 Ratio of excess winter deaths (observed winter deaths minus expected deaths based on non-winter deaths) to average non-winter deaths 01.08.10-31.07.13 25, 26 At birth, 2011-13 27 Rate per 1,000 live births, 2011-13 28 Directly age standardised rate per 100,000 population aged 35 and over, 2011-13 29 Directly age standardised mortality rate from suicide and injury of undetermined intent per 100,000 population, 2011-13 30 Directly age standardised rate per 100,000 population aged under 75, 2011-13 31 Directly age standardised rate per 100,000 population aged under 75, 2011-13 32 Rate per 100,000 population, 2011-13

† Indicator has had methodological changes so is not directly comparable with previously released values.

^ “Regional” refers to the former government regions.
